Food safety is particularly important for people, and it is important to prevent and control food poisoning. Food poisoning may cause death, hospitalization or disability, and may seriously affect people's health. The disease is mainly caused by the consumption of food or water polluted by pathogenic microorganism. Depending on the kind and number of microorganisms, poisoning may be caused by infection with pathogenic Escherichia coli, shigella, aeromonas, salmonella, etc. generally, bacteria or toxin produced by bacteria are main reasons of food poisoning. Bacteria and toxins contained in food may be harmful to people.
