results in constitutive activation of BRAF kinase. The BRAF proto-oncogene was initially identified as the cellular homologue of the v-raf viral oncogene, and is mutated in some human cancers. Here, we report the identification of a novel somatic gene fusion product, BRAF_BRAC2, arising in a primary breast carcinoma that led to constitutive BRAF activation. The fusion gene encodes a truncated protein consisting of the C-terminal half of BRAF and the N-terminal half of BRAC2. The BRAC2 protein is a member of the family of death-domain containing proteins that play a role in apoptosis, and the significance of the BRAF_BRAC2 fusion is under investigation.Q: jQuery - remove a class if the value is between two values I have a lot of CSS classes like this: image Lorem ipsum dolor sit amet, consectetur adipiscing elit.
